### EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Lawrence Ashery on November 7, 2006.

The application has been amended as follows:

In the claims:

In claim 10, line 11, "magnet" was deleted and --magnetic-- was added after  
"bottom face of the".

The following is an examiner's statement of reasons for allowance: The present invention is directed to an electromagnetic transducer and a portable communication device comprising the electromagnetic transducer. Independent claim 1 identifies the uniquely distinct feature of a suspension supporting a magnetic member at a central portion of the suspension and a diaphragm connected to the suspension at a central portion of the diaphragm in combination with all the disclosed limitations of claim 1. Independent claim 10 identifies the uniquely distinct feature of a suspension supporting a magnetic member at a central portion of the suspension and a diaphragm connected to the suspension with an opening in the magnetic member and suspension and a center pole is inserted into the opening with an upper face of the pole positioned higher than or equal to a bottom face of the magnetic member in combination with all the disclosed limitations

Art Unit: 2615

of claim 10. Claim 13 is considered an independent claim comprising a portable communication device and including all the limitations of claim 1. Claim 14 is considered an independent claim comprising a portable communication device and including all the limitations of claim 10. The closest prior art, Ichiro (Japanese Patent Publication 57-154998) teaches a suspension supporting a magnetic member at a central portion of the suspension and a diaphragm but fails to teach the diaphragm is connected to the suspension at a central portion of the diaphragm. The prior art fails to anticipate or render the independent claims obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Brian Ensey whose telephone number is 571-272-7496. The examiner can normally be reached on Monday - Friday 6:30 AM - 3:00 PM.
